

UNITED STATES COURT OF APPEALS

FOR THE SECOND CIRCUIT

August Term, 2012

(Argued: May 8, 2013

Decided: January 29, 2014)

Docket No. 12-2509-cv

ANDREW E. ROTH, DERIVATIVELY ON BEHALF OF LEAP WIRELESS
INTERNATIONAL, INC.,

Plaintiff-Appellant,

v.

THE GOLDMAN SACHS GROUP, INC., GOLDMAN, SACHS & CO., LEAP
WIRELESS INTERNATIONAL, INC.,

Defendants-Appellees.

B e f o r e: WINTER, CABRANES, and LIVINGSTON, Circuit Judges.

Appeal from a judgment of the United States District Court
for the Southern District of New York (J. Paul Oetken, Judge),
dismissing appellant's derivative action for failure to state a
claim. Appellant sought to hold appellees liable for failing to
disgorge "short-swing profits" as required by Section 16(b) of
the Securities Exchange Act and Securities and Exchange
Commission Rule 16b-6(d). Appellees were statutory insiders when
they wrote call options but not when the same options expired
less than six months later. We affirm.

17 Exchange Commission.
18

19
20 WINTER, Circuit Judge:
21

22 Andrew Roth appeals from Judge Oetken's dismissal under Fed.
23 R. Civ. P. 12(b)(6) of his derivative action on behalf of Leap
24 Wireless International, Inc. ("Leap"). He seeks to hold the
25 Goldman Sachs Group and its wholly owned subsidiary Goldman,
26 Sachs & Co. (collectively, "Goldman") liable under Section 16(b)
27 of the Securities Exchange Act ("Exchange Act")¹ and Rule

¹ Section 16(b) provides:

(b) Profits from purchase and sale of security within six months

For the purpose of preventing the unfair use of information which may have been obtained by such beneficial owner, director, or officer by reason of his relationship to the issuer, any profit realized by him from any purchase and sale, or any sale and purchase, of any equity security of such issuer (other than an exempted security) or a security-based swap agreement involving any such equity security within any period of less than six months, unless such security or security-based swap agreement was acquired in good faith in connection with a debt previously contracted, shall inure to and be recoverable by the issuer, irrespective of any intention on the part of such beneficial owner, director, or officer in entering into such transaction of holding the security or security-based swap agreement purchased or of not repurchasing the security or security-based swap agreement sold for a period exceeding six months. Suit to recover such profit may be instituted at law or in equity in any court of competent jurisdiction by the issuer, or by the owner of any security of the issuer in the name and in behalf of the issuer if the issuer shall fail or refuse to bring such suit within sixty days after request or shall fail diligently to prosecute the same thereafter; but no such suit shall be brought more than two years

1 16b-6(d)² for their failure to disgorge "short-swing profits"
2 derived from writing call options on Leap stock.

3 Although Section 16(b) is long in the tooth -- older even
4 than the author of this opinion -- and the subject of countless
5 judicial interpretations, it seems to be an ever-growing fount of
6 close questions as to its meaning. The issue here arises from
7 the fact that Goldman owned over ten percent of Leap's equity
8 shares -- a statutory insider under Section 16(b) -- when it
9 wrote certain call options, but owned under ten percent when the
10 unexercised options expired less than six months later. The
11 principal issues are whether: (i) a call option's expiration
12 within six months of its writing constitutes a "purchase" for
13 Section 16(b) purposes that can be matched to the "sale" that is
14 deemed under Rule 16b-6(a) to occur at the option's writing; and
15 (ii) if so, whether the loss of statutory insider status before
16 the expiration eliminates the need for disgorgement under Section
17 16(b). Concluding the expiration was a "purchase" but that the

after the date such profit was realized. This subsection shall not be construed to cover any transaction where such beneficial owner was not such both at the time of the purchase and sale, or the sale and purchase, of the security or security-based swap agreement or a security-based swap involved, or any transaction or transactions which the Commission by rules and regulations may exempt as not comprehended within the purpose of this subsection.
15 U.S.C. § 78p(b).

² Rule 16b-6(d) provides:

(d) Upon cancellation or expiration of an option within six months of the writing of the option, any profit derived from writing the option shall be recoverable under section 16(b) of the Act. The profit shall not exceed the premium received for writing the option. The disposition or closing of a long derivative security position, as a result of cancellation or expiration, shall be exempt from section 16(b) of the Act where no value is received from the cancellation or expiration.

17 C.F.R. § 240.16b-6(d).

1 Goldman defendants were not statutory insiders at the time of the
2 "purchase," the district court held that Goldman was not required
3 to disgorge any profits. We affirm.

4 BACKGROUND

5 Appellant's complaint alleges the following. Goldman owned
6 common stock in Leap. On September 30, 2009, Goldman's ownership
7 stake in the company surpassed ten percent, rendering it a
8 statutory insider subject to the reporting and disgorgement
9 requirements of Section 16.³ On the same date, Goldman wrote
10 32,000 call options that covered 3.2 million shares of Leap and
11 were exercisable at \$39/share. The options were sold at
12 \$0.33/share for a total of \$1,056,000 and bore an expiration date
13 of January 16, 2010. On October 2, 2009, Goldman's disposal of
14 Leap shares dropped its ownership stake below ten percent.

15 In an October 6, 2009, e-mail message to Leap, Goldman
16 disclosed that it had generated profits from purchases and sales
17 of Leap securities unrelated to the options described above
18 during the period when Goldman was a statutory insider. Pursuant
19 to Section 16(b), Goldman (voluntarily) disgorged to Leap the

³ Section 16 applies to "[e]very person who is directly or indirectly the beneficial owner of more than 10 percent of any class of any equity security" of the issuer. 15 U.S.C. § 78p(a). Under Rule 16a-1(a), the definition of beneficial owner is found in Section 13(d) of the Exchange Act and accompanying rules. Under Section 13(d)(3), *see id.* § 78m(d)(3), "[w]hen two or more persons act as a . . . group for the purpose of acquiring, holding, or disposing of securities of an issuer, such syndicate or group shall be deemed a 'person' for the purposes of this subsection." Appellant's complaint alleges that the Goldman appellees-defendants constitute such a "group." Because we are reviewing a dismissal under Fed. R. Civ. P. 12(b)(6), we must, therefore, assume that Goldman is a group subject to the statute's requirements.

1 profits -- totaling about \$203,000 -- derived from these
2 transactions.

3 On January 16, 2010, the call options at issue here expired
4 unexercised.

5 On June 14, 2011, appellant, a Leap shareholder, made a
6 demand on Leap to sue Goldman under Section 16(b) and Rule
7 16b-6(d) for Goldman's alleged failure to disgorge profits earned
8 by writing the short call options that expired unexercised within
9 six months. In response, Leap referenced the profits already
10 voluntarily disgorged by Goldman and communicated that it
11 "consider[ed] the matter closed."

12 Appellant filed the present action on July 13, 2011.
13 Goldman and Leap (the latter as a nominal defendant) moved to
14 dismiss the action for failure to state a claim. The district
15 court granted the motions, holding: (i) Both a purchase and a
16 sale must exist to trigger liability under the statute. Under
17 Section 16(b), the expiration of a short call option constitutes
18 a purchase to be matched with the sale that is deemed to occur
19 when the option is written. (ii) Goldman was a statutory insider
20 only when the options were written, not when they expired. (iii)
21 Goldman was, therefore, not required to disgorge profits earned
22 from writing the options because the statute requires statutory
23 insider status at the time of both purchase and sale. Reliance
24 Elec. Co. v. Emerson Elec. Co., 404 U.S. 418, 423-25 (1972).
25 Appellant timely appealed.

1 After the close of briefing but before oral argument, we
2 invited the SEC to submit an amicus curiae brief regarding the
3 merits of the appeal. That brief, when filed, agreed with the
4 district court.

5 DISCUSSION

6 "We review a district court's dismissal of a complaint
7 pursuant to Rule 12(b)(6) de novo." Operating Local 649 Annuity
8 Trust Fund v. Smith Barney Fund Mgmt. LLC, 595 F.3d 86, 91 (2d
9 Cir. 2010).

10 The question before us is whether, to fall under the
11 disgorgement requirements of Section 16(b) and Rule 16b-6(d), an
12 expiration of a call option is a "purchase" and the writer of a
13 call option must be a ten percent owner both at the time it
14 writes the option and at the time the option expires. We begin
15 with the pertinent statutory and regulatory framework.

16 a) Section 16(b)

17 Stated simply, liability under Section 16(b), quoted in Note
18 1, supra, attaches when "there was (1) a purchase and (2) a sale
19 of securities (3) by . . . a shareholder who owns more than 10
20 percent of any one class of the issuer's securities (4) within a
21 six-month period." Gwozdzinsky v. Zell/Chilmark Fund, L.P., 156
22 F.3d 305, 308 (2d Cir. 1998). It is intended to "prevent[] the
23 unfair use of information which may have been obtained" by
24 company insiders by requiring that "any profit realized by [the
25 insider] from any purchase and sale, or any sale and purchase, of
26 any equity security of such issuer (other than an exempted

1 security) . . . within any period of less than six months . . .
2 shall inure to and be recoverable by the issuer, irrespective of
3 any intention on the part of such [insider]." 15 U.S.C. §
4 78p(b). Section 16(b) applies to "[e]very person who is directly
5 or indirectly the beneficial owner of more than 10 percent of any
6 class of any equity security" of the issuer, id. § 78p(a), and
7 states that it "shall not be construed to cover any transaction
8 where [a statutory insider] was not such both at the time of the
9 purchase and sale, or the sale and purchase, of the security
10 . . . involved," id. § 78p(b).

11 Section 16(b) is generally subject to mechanical
12 application. It "'imposes a form of strict liability' and
13 requires insiders to disgorge . . . 'short-swing' profits 'even
14 if they did not trade on inside information or intend to profit
15 on the basis of such information.'" Credit Suisse Sec. (USA) LLC
16 v. Simmonds, 132 S. Ct. 1414, 1417 (2012), quoting Gollust v.
17 Mendell, 501 U.S. 115, 122 (1991); accord Magma Power Co. v. Dow
18 Chem. Co., 136 F.3d 316, 320-21 (2d Cir. 1998) ("No showing of
19 actual misuse of inside information or of unlawful intent is
20 necessary to compel disgorgement."). As the Supreme Court has
21 noted, "the only method Congress deemed effective to curb the
22 evils of insider trading was a flat rule taking the profits out
23 of a class of transactions in which the possibility of abuse was
24 believed to be intolerably great." Reliance Elec. Co., 404 U.S.
25 at 422.

1 In the past, the customary mechanical application of Section
2 16(b) was largely saved from arbitrariness because the underlying
3 rules were discernible and provided predictability. However, the
4 growing complexities of financial transactions have generated
5 numerous issues of statutory interpretation that admit of no
6 clear resolution. The courts and the SEC have responded to these
7 developments in two ways.

8 First, the Supreme Court has permitted a departure from
9 "flat rule[s]" in a very limited number of situations. For
10 example, it has noted that "[t]he statutory definitions of
11 'purchase' and 'sale' are broad" and have the potential to "reach
12 many transactions not ordinarily deemed a sale or purchase."
13 Kern Cnty. Land Co. v. Occidental Petroleum Corp., 411 U.S. 582,
14 593-94 (1973). Given that breadth, "'courts have properly asked
15 whether the particular type of transaction involved is one that
16 gives rise to speculative abuse,'" where the instrument or
17 transaction is "unorthodox" or "borderline."⁴ Id. at 594-95,
18 quoting Reliance Elec. Co., 404 U.S. at 424 n.4.

19 Second, the SEC has promulgated a substantial number of
20 rules addressing the increasing use of instruments and
21 transactions that do not fit comfortably into Section 16(b)'s
22 simplistic scenario of purchases and sales of common shares. As
23 explained below, the SEC has promulgated rules governing options
24 of the kind that give rise to the present appeal.

⁴ This approach has been viewed as very limited by some courts. See Texas Int'l Airlines v. Nat'l Airlines, Inc. 714 F.2d 533, 539-40 (5th Cir. 1983)(limiting Kern County to forced sales).

1 b) SEC Section 16 Rules

2 A call option is a type of instrument commonly described as
3 a derivative.⁵ Because derivative securities are not explicitly
4 covered by Section 16(b), the SEC adopted Rule 16b-6 in 1991 "to
5 effect the purposes of section 16 and to address the
6 proliferation of derivative securities and the popularity of
7 exchange-traded options." Ownership Reports and Trading by
8 Officers, Directors and Principal Security Holders, Exchange Act
9 Release No. 34-28869, Investment Company Act Release No.
10 35-25254, 56 Fed. Reg. 7242, 7248 (Feb. 21, 1991). The adoption
11 was based on the SEC's conclusion that, because the value of a
12 derivative security is tied to the value of the underlying equity
13 security, "holding derivative securities is functionally
14 equivalent to holding the underlying equity securities for
15 purposes of section 16." Trading in derivatives might,
16 therefore, give rise to speculative abuse.⁶ Id.

17 Appellant seeks to hold Goldman liable under Rule 16b-6(d),
18 quoted in Note 2, supra. To reiterate, it provides in relevant
19 part that "if an insider writes an option that expires
20 unexercised within six months and profits from doing so on
21 account of having been paid by the purchaser for a right to buy

⁵ Derivatives are "financial instruments that derive their value (hence the name) from an underlying security or index." Magma Power, 136 F.3d at 321. "An option . . . is a purchased right to buy or sell property at a fixed or floating price A call option gives the option holder the right to buy shares of an underlying security at a particular price." Id. at 321 n.2 (citations omitted).

⁶ The SEC now defines "equity security" to mean "any equity security or derivative security relating to an issuer, whether or not issued by that issuer." 17 C.F.R. § 240.16a-1(d).

1 shares that the purchaser did not exercise, the writer will be
2 held liable." Allaire Corp. v. Okumus, 433 F.3d 248, 252 (2d
3 Cir. 2006). The Rule "is designed to prevent a scheme whereby an
4 insider with inside information favorable to the issuer writes
5 a[n] . . . option, and receives a premium for doing so, knowing,
6 by virtue of his inside information, that the option will not be
7 exercised within six months." Gwozdzinsky, 156 F.3d at 309.

8 As noted, two transactions -- a sale and a purchase of
9 securities -- are required to trigger liability under Section
10 16(b), and the status as a statutory insider must exist at the
11 time of each transaction. Reliance Elec. Co., 404 U.S. at 423-
12 25. Rule 16b-6 defines, for the most part, derivative
13 transactions as either sales or purchases for the purposes of the
14 statute. These categorizations are premised on the fact that
15 "[j]ust as an insider's opportunity to profit commences when he
16 purchases or sells the issuer's common stock, so too the
17 opportunity to profit commences when the insider engages in
18 transactions in options or other derivative securities that
19 provide an opportunity to obtain or dispose of the stock at a
20 fixed price." 56 Fed. Reg. at 7248.

21 For example, Rule 16b-6(a) provides that "the establishment
22 of or increase in a put equivalent position . . . shall be deemed
23 a sale of the underlying securities for purposes of section 16(b)
24 of the Act." 17 C.F.R. § 240.16b-6(a). The definitional section
25 of the regulations explains that writing a fixed-priced call
26 option is functionally the same as taking a "put equivalent

1 position." Such "a derivative security position . . . increases
2 in value as the value of the underlying equity decreases,"
3 because, when the market price of the security is above but
4 dropping close to the strike price, the cost to the writer of
5 selling at the strike price decreases. 17 C.F.R. § 240.16a-1(h).
6 If the market price falls below the strike price, the option
7 holder will not exercise it, and the writer will profit on the
8 premium. Following the same logic, the regulations provide that
9 "[t]he closing of a derivative security position as a result of
10 its exercise or conversion shall be exempt from the operation of
11 section 16(b) of the Act." 17 C.F.R. § 240.16b-6(b).

12 But while Rule 16b-6(a) equates the establishment of a put
13 equivalent position to a sale, Rule 16b-6(d) does not identify
14 the events it lists -- the writing and the expiration of the
15 option -- as either purchases or sales. However, in a release
16 regarding the then-proposed 1991 Amendments to the Section 16
17 Rules, the SEC stated: "[a] grant of an option may be viewed as
18 a sale of the derivative security by the writer of the option, if
19 consideration is received for the option." Ownership Reports and
20 Trading by Officers, Directors and Principal Stockholders,
21 Exchange Act Release No. 34-26333, 53 Fed. Reg. 49997-02, 50009
22 (Dec. 13, 1988). In the same release, the SEC noted: "in the
23 case of an expiration of a short option position, the expiration
24 would be treated as the purchase of the option because there is
25 short-swing profit potential in such a case." *Id.* at 50008. The
26 SEC advances the same view here in its amicus brief. Important

1 to our disposition of this appeal, therefore, is the deference we
2 must give to an agency's interpretation of its own regulations --
3 as expressed here in the SEC Release quoted above and in its
4 amicus brief -- unless the proffered interpretation is "plainly
5 erroneous or inconsistent with the regulations." See Auer v.
6 Robbins, 519 U.S. 452, 461-63 (1997) (internal quotation marks
7 omitted); accord Press v. Quick & Reilly, Inc., 218 F.3d 121,
8 128-29 (2d Cir. 2000).

9 c) Application

10 Although neither party contests that the writing of a call
11 option constitutes a sale under Section 16(b), see, e.g.,
12 Gwozdzinsky, 156 F.3d at 309, both challenge the district court's
13 holding that a short call option's expiration amounts to a
14 Section 16(b) purchase by the option writer. The parties claim
15 instead that the passive expiration of a short call option is a
16 statutory nonevent in all cases under the statute; this
17 conclusion, they argue, is compelled by our holdings in Magma
18 Power and Allaire.

19 While the parties agree on this premise, each nevertheless
20 argues for a different outcome. Acknowledging that two separate
21 transactions are necessary elements of Section 16(b)'s
22 disgorgement requirement, Goldman invites us to invalidate the
23 portion of Rule 16b-6(d) that pertains to short call option
24 expirations.⁷ Appellant, on the other hand, argues that the

⁷ Of course, Goldman also argues that, if we find that the expiration of an option under Rule 16b-6(d) is a Section 16(b) purchase, it cannot be held liable because it was no longer a statutory insider at the time of the options' expiration. We agree with that proposition. See infra.

1 writing of a short call option constitutes a simultaneous sale
2 and purchase under the statute, based on a theory that the writer
3 commits itself to a subsequent purchase of the underlying stock
4 at the instant it takes a short position on a call option.
5 According to appellant, then, because Goldman was a statutory
6 insider when the options were written -- at the time of the
7 asserted simultaneous sales and purchases -- for Section 16(b)
8 purposes, it is of no consequence that Goldman was not a
9 statutory insider at the time of the option's expiration.

10 However, both parties misconstrue our precedents, and we
11 adopt the district court's holding and the SEC's interpretation:
12 for purposes of Section 16(b), the expiration of a call option
13 within six months of its writing is to be deemed a "purchase" by
14 the option writer to be matched against the "sale" deemed to
15 occur when that option was written. Rule 16b-6(d) was adopted to
16 eliminate the potential that an insider/option-writer could
17 generate profits by "knowing, by virtue of his inside
18 information, that the option will not be exercised within six
19 months." Gwozdzinsky, 156 F.3d at 309. When an insider sells a
20 call option, and that same option expires unexercised less than
21 six months later, the writer's opportunity to profit on the
22 underlying stock is realized. It is for this reason that the SEC
23 determined, "in the case of an expiration of a short option
24 position, the expiration would be treated as the purchase of the
25 option." 53 Fed. Reg. at 50008. We follow that resolution of
26 the issue.

1 Neither Magma Power nor Allaire mandates a different result.
2 In Magma Power, we concluded that an option holder's decision not
3 to exercise an option to buy stock does not constitute a
4 transaction by the option holder for the purposes of the
5 statute.⁸ 136 F.3d at 324-25. Goldman is not the option holder,
6 however, but the option writer. While the option holder's
7 decision not to purchase shares may not constitute a transaction
8 on the part of the option holder, we have never held as much with
9 respect to the option writer.

10 Nor does Allaire, an opinion regarding the application of
11 Rule 16b-6(a), control our decision. In Allaire, the defendants
12 wrote call options on Allaire stock prior to becoming statutory
13 insiders. Thereafter, the defendants acquired enough shares to
14 push their ownership stake above ten percent. The original
15 options then expired unexercised (just one month after they were
16 written). About a month later, while the defendants were still
17 insiders, they wrote a new set of call options on Allaire stock.
18 433 F.3d at 249.

19 Allaire argued that, under Rule 16b-6(a), the expiration of
20 the initial set of options constituted a "purchase" of the stock

⁸ The particular option in Magma Power referenced by the parties was a floating-price-option component that was part of a more complex instrument (the "Note"), and was retained by the insider after it sold the Note. The Note itself included a call option that could be exercised by the Note holder. The component the insider retained allowed it, when the Note holder decided to exercise its option, either to reacquire shares by paying the Note holder the shares' market value in cash, or to fulfill the Note holder's call with shares. 136 F.3d at 324-25. The insider fulfilled its obligation on the Note with shares rather than cash -- that is, deciding not to exercise its option to purchase shares. Id. After a thorough analysis, we determined that the insider's decision to not repurchase shares was not the equivalent of a purchase under 16b-6(a).

1 because "it represents a liquidation of or decrease in a put
2 equivalent position"; the second set of options then, when
3 written, amounted to the establishment of a new put equivalent
4 position -- a sale that, according to Allaire, could be matched
5 to the purported purchase. Id. at 249, 251. We held that the
6 expiration of the first set of options did not constitute a
7 purchase under Section 16b-6(a) matchable to the later sale of a
8 different set of call options. Id. at 252.

9 When read out of that context, there is language in Allaire
10 that would seem in tension with our conclusion that the
11 expiration of a call option under Rule 16b-6(d) constitutes a
12 purchase by the option writer. But we reiterate, to the extent
13 that Allaire did not make it clear, that this language applies
14 only to short call option expirations under Rule 16b-6(a).
15 Indeed, "[t]he principal issue" in Allaire was "whether, under
16 Rule 16b-6(a), the expiration of a short call option is a
17 purchase, thereby exposing its insider/writer to section 16(b)
18 liability if within six months after that expiration he or she
19 also wrote (sold) another such call option." Id. at 251
20 (emphasis added).

21 Given the facts of Allaire, there are sound reasons to view
22 our holding there as limited to call-option expirations under
23 Rule 16b-6(a). The danger of misuse of non-public information
24 exists at the time the option is written, and the expiration of
25 that option is the moment of profit. Matching writings with
26 expirations of different options does not clearly advance the

1 purposes of the statute. Options written at different times are
2 less likely to give rise to speculative abuse, and matching the
3 expiration of an option only to its own writing recognizes the
4 more evident danger.

5 The Allaire opinion itself makes this clear. For example,
6 we observed that, under Rule 16b-6(a), "when the option is
7 written by the insider (and not canceled), leaving the insider
8 with no control over whether or not it will be exercised, his or
9 her inside information, at least in the usual case, cannot be
10 employed for his or her personal profit." Id. at 252. We
11 concluded, "neither the holder's exercise of the option nor the
12 holder's allowing the option to expire constitutes a transaction
13 by the option's writer." Id. Moreover, at several junctures,
14 Allaire was careful to note that its holding applied only to
15 option expirations under Rule 16b-6(a). See id. ("Just as the
16 holder's exercise of a call option is not a 'sale' by the writer
17 under Rule 16b-6(a), neither is the expiration of a call option a
18 'purchase' by the writer under that provision." (emphases
19 added)); id. at 253("If the expiration of a call option were a
20 purchase under Rule 16b-6(a), what purpose would it serve to
21 provide, as Rule 16b-6(d) does, that the expiration of an option
22 within six months of its writing triggers liability?"); id. at
23 254 ("[T]he writing of an option may be a 'transaction' under
24 section 16(b) but . . . the expiration of an option, when matched
25 against any transaction other than its own writing, is not."
26 (emphasis added)).

1 Allaire's express and implied references to Rule 16b-6(d),
2 therefore, beg the question we answer: when matched against its
3 own writing, the expiration of an option within six months is a
4 "transaction" -- a purchase by the option writer -- for the
5 purposes of Section 16(b).

6 Appellant's theory -- that the writing of an option
7 constitutes a simultaneous purchase and sale -- finds support
8 neither in the statutory text, the SEC Rules, nor in our
9 precedents. Section 16(b) plainly requires separate
10 transactions.

11 To the extent appellant argues that the broad, statutory
12 definitions of "purchase" and "sale" encompass the circumstances
13 here -- essentially that both definitions should apply to the
14 transaction that occurs when the option is written to effectuate
15 the purposes of the statute -- that argument is contrary to the
16 statutory text, which is clearly addressed to separate
17 transactions. Moreover, it ignores the real possibility that the
18 holder will exercise the option. Most importantly, the SEC
19 undertook this identical inquiry when it promulgated Rules
20 establishing that there are two relevant transactions at separate
21 points in time: the writing of the option and its expiration.⁹

⁹ Appellant cites to several district court cases in support of his simultaneous purchase and sale theory, none of which are persuasive. See, e.g., Matas v. Siess, 467 F. Supp. 217 (S.D.N.Y. 1979) (exercise of stock appreciation rights for cash under company plan was an unorthodox transaction that the court treated as both a purchase and sale for purposes of Section 16(b), where defendants timed the exercise to maximize the difference, which they received in cash, between the option price and the market price on the date of exercise).

1 While the SEC's resolution may not be the only reasonable
2 one, it is certainly within the realm of reason, and we defer to
3 it. Press, 218 F.3d at 128-29. Section 16(b) was written to
4 govern a financial world of largely square pegs and square holes.
5 The growing use of oval, rectangular, triangular, star-like, etc.
6 pegs, creates problems without clear solutions. We are not free
7 to reject the SEC's view as to the most desirable, if not
8 perfect, solution to particular issues.

9 In that regard, appellant warns of the dangers associated
10 with the holding we now adopt, cautioning that a statutory
11 insider can simply write an option and then divest himself of
12 shares enough that he is no longer subject to Section 16(b)'s
13 disgorgement requirements. However, this argument is foreclosed
14 by Reliance Electric, which allowed a statutory insider to
15 purposefully drop its holdings to slightly under ten percent so
16 as to sell the remainder without liability under Section 16(b).
17 When it enacted Section 16(b), "Congress did not reach every
18 transaction in which an investor actually relies on inside
19 information." Reliance Elec. Co., 404 U.S. at 422. For example,
20 the statute "clearly contemplates that a statutory insider might
21 sell enough shares to bring his holdings below ten percent, and
22 later -- but still within six months -- sell additional shares
23 free from liability under the statute," id. at 423, creating the
24 very situation of which appellant calls upon us to be
25 apprehensive. As in the case of structured transactions designed
26 to drop below ten percent, we must also follow the instruction

1 that "[l]iability cannot be imposed simply because the investor
2 structured his transaction with the intent of avoiding liability
3 under [Section] 16(b)." Id. at 422.

4 The prophylactic disgorgement rule of Section 16(b) is not
5 an all-encompassing remedy for every occasion when insiders
6 succeed in writing options and disposing of stock in a way that
7 allows a profit based on inside information. Section 16(b)
8 requires that a statutory insider must have such status at the
9 time of the sale and the purchase of securities in order to be
10 liable. Therefore, to be liable, Goldman had to have been a
11 statutory insider both at the time of the option's writing and at
12 the time of its expiration. Because Goldman was no longer a
13 statutory insider at the time the options expired in January
14 2010, it is not liable.

15 CONCLUSION

16 To summarize:

17 (1) For purposes of Section 16(b), the expiration of a call
18 option within six months of its writing is to be deemed a
19 "purchase" by the option writer to be matched against the "sale"
20 deemed to occur when that option was written.

21 (2) Section 16(b) requires statutory insider status at the
22 time of both purchase and sale, and so Goldman was not required
23 to disgorge profits where it was a statutory insider only when
24 the options were written, but not when they expired.

25 For the reasons stated above, we affirm the June 8, 2012,
26 judgment of the district court.
